ACEA Engine Oil Specifications - oilspecifications.org

The European Automobile Manufacturers' Association or ACEA define oil specifications that are known as ACEA Oil Sequences. Updated every 4 years (the most recent being 2016) these specs are made up of a letter(s) that highlight the class and a number that defines the categories, with A/B & C representing passenger cars and light commercial vehicles.

Understanding Engine Oil: The ABC's of ACEA Specifications

Shop For ACEA C2 Spec Car Engine Oil. ACEA C3. Same as C2 except for HTHS > 3.5 and without Fuel Economy performance. Stable, stay-in-grade oil intended for use as catalyst compatible oil in vehicles with DPF and TWC in high performance car and light van diesel and petrol engines, with a minimum HTHS viscosity of 3.5mPa.s.

ACEA Car Engine Oil Explained | Petrol & Diesel Motor Oil

The ACEA introduces new specifications or sequences, as engines and oils change and the EU introduces new emissions specifications. A new sequence usually means the oil has better performance and a reduction in ingredients like phosphorus or sulfur. New sequences typically mean more testing and procedures.

ACEA Oil Guide: Understanding European Motor Oils

ACEA engine oil specification What does ACEA mean? ACEA is the abbreviation for Association des Constructeurs Europeens d'Automobiles (Union of European car manufacturers). This committee has developed new classifications for the application of engine oils in gasoline, passenger cars diesel and heavy-duty

ACEA engine oil specification What does ACEA mean?

A5/B5: Stable, stay-in-grade engine oil intended for use at extended drain intervals in passenger car and light duty van gasoline and diesel engines designed to be capable of using low viscosity oils with high temperature high shear (HTHS) viscosity of 2.9 to 3.5 mPa s.

The New Generation of dexos and ACEA Specifications | 2017 ...

The increasingly severe emission legislation for heavy duty diesel engines forces engine builders to modify their engine designs drastically. Together with a desire for longer drain intervals, this results in changes in engine oil specifications. Recently, a new ACEA specification for heavy duty diesel engine oils - E5 - has been added to the existing E1-E4 categories, and E1 has been withdrawn.

Similarities and Differences Between ACEA E3, E4 and E5 ...

A5/B5Stable, stay-in-grade Engine Oil intended for use at extended Drain Intervals in Passenger Car & Light Duty Van Gasoline & Diesel Engines designed to be capable of using Low Viscosity Oils with HTHS Viscosity of 2.9 to 3.5 mPa s.

ACEA EUROPEAN OIL SEQUENCES 2016

Largely based on the ACEA C2 oil sequence this spec requires a low SAPS 5W20 oil and is primarily designed for the 1.0 liter, 3-cylinder EcoBoost engine. Contains in-house tests for fuel economy and piston deposit control. Oils meeting this spec must provide a 0.9% fuel economy improvement over regular 5W-20 oils.

Ford Oil Specifications - oilspecifications.org

Special motor oil for the following gasoline engines only: N20, Bx8 from model year 2014. Not allowed for diesel engines. BMW Longlife-17 FE (BMW LL-17 FE) This specification requires a low SAPS, usually ACEA C5 compliant, 0W20 oil. Oils meeting this specification are usually recommended for the newest gasoline and diesel-powered BMWs.

BMW Oil Specifications - oilspecifications.org

ACEA oil sequences define the minimum quality level of a product for presentation to ACEA members. ACEA itself does not certify oils or license or register compliance certificates. Oil manufacturers are themselves responsible for carrying out all oil testing and evaluation according to recognised practices.

oilspecifications.org - Lubricant standards and specifications

An old car engine might be perfectly happy with a few good glugs of old-fashioned SAE 20W 50 mineral oil, but engine technology has moved on and the demands on engine oils have moved on too. So here's a guide to engine oil types, standards and jargon to help you hack your way through this oily jungle

Engine oils explained | Haynes Publishing

ACEA 2016: Good Bye A1/B1, Welcome C5. The European Automobile Manufacturers' Association (ACEA) introduced its new oil sequences on December 1, 2016. The new specifications have been long awaited by the industry since there have been 4 years between the ACEA 2012 and ACEA 2016 sequences. The major changes from the last series and this one are the replacement of obsolete tests, the removal of A1/B1 and the introduction of the C5 category.

ACEA 2016: Good Bye A1/B1, Welcome C5 - oilspecifications.org

ACEA SPECIFICATIONS The ACEA engine oil specifications for petrol and diesel engines differentiate between the Ax/Bx classifications and the Cx classifications with limits in the sulfated ash, phosphorus and sulfur contents.

ACEA Standards - TPS

This document details the ACEA 2016 European Oil Sequences (REV 2) for service-fill oils for gasoline engines, for light-duty diesel engines, for gasoline and diesel engines with after-treatment devices and for heavy-duty diesel engines. It is a necessary correction to the document provided with the previous ACEA update on 29 August 2018.
